

XXL HOSES & CONNECTORS

LARGE BORE CHOICE FOR HIGH FLOW RATES

XXL HOSES & CONNECTORS

APPLICATIONS FOCUS

High power systems are increasing their capacity in the hydraulic market and require appropriate connectors. Since it is good practice to cap the fluid velocity at a max value (< 10 meters/sec) in order to limit the fluid turbulence, the only way to increase the power transfer capacity of a connector **is to increase its size (S) and its pressure resistance (p)**.

Manuli XXL products have been designed to meet these requirements and are the ideal solution for any high power transmission in large hydraulic equipment, working with high flow rates (suction/return lines) and/or medium to high pressures (pressure/discharge lines).

A growing sensitivity to efficient Fluid Power is now promoting manufacturers and designers to reduce any type of power loss throughout the hydraulic system. Connectors can bear an important contribution in reducing localised and distributed pressure losses.

A way to reach this goal is to increase the size of connectors which reduces the fluid velocity for a given transferred power.

The same Manuli XXL products can be an ideal product when pressure drops need to be reduced in order to increase the efficiency of the hydraulic system.

The main applications where **high power/high efficient hydraulics** are required are giant machines for various industrial activities: open pit and underground mining, shipyards and offshore platforms, dredging and quarrying, large construction equipment, industrial sites (steel mills, refineries), etc.

The constant need of higher output capacity and productivity is stimulating a continuous improvement in such equipment for higher power and better efficiency that demands advanced hydraulic components..

 Hydraulic Power (W) transmitted through connectors is given by

$$W = p \times Q$$

p = working pressure
 Q = flow rate
 $Q = S \times v$
(S is the cross section of the connector and v is the local fluid velocity).

XXL HOSES & CONNECTORS

APPLICATIONS FOCUS

The XXL hose range achieves in all cases high hydraulic power transmission rates, as illustrated in this chart by hose type and size

Hose type		Hose structure	DN (mm) / -dash inch	63 / -40 2-1/2"	76 / -48 3"	89 / -56 3-1/2"	102 / -64 4"
XTRAFLOW	HIGH TEMP. LOW PRESSURE	XTRAFLOW/HT 2 wire braids, special polymer for high temperature 135°C.	WP (MPa)	3,5	3,5	3,5	
			Fitting solution	MF	MF	MF	
			Min. Bend Radius (mm)	254	355	475	
	LOW-MEDIUM PRESSURE	XTRAFLOW/2WB 2 wire braids robust structure, "SHARC" Super High Abrasion Resistant Cover	WP (MPa)	10,5	8,0	3,5	
			Fitting solution	SP	SP	SP	
			Min. Bend Radius (mm)	510	510	710	
XTRAFLOW/4WS 4 wire spirals, compact architecture, "SHARC" Super High Abrasion Resistant Cover		WP (MPa)	14,0	10,5	8,0	3,5	
		Fitting solution	SP	SP	SP	SP	
		Min. Bend Radius (mm)	700	700	800	900	
DIAMOND SPIR	HIGH PRESSURE	DIAMOND SPIR/14 wire spirals structures, compact architecture, "ROCKMASTER" cover, INTERLOCK fittings	WP (MPa)	-	14,0		
			Fitting solution	-	IP		
			Min. Bend Radius (mm)	-	700		
	DIAMOND SPIR/21 wire spirals structures, compact architecture, "ROCKMASTER" cover, INTERLOCK fittings	WP (MPa)	21,0	21,0			
		Fitting solution	IP	IP			
		Min. Bend Radius (mm)	700	900			
	DIAMOND SPIR/35 wire spirals structures, robust architecture, "ROCKMASTER" cover, INTERLOCK fittings	WP (MPa)	35,0	35,0			
		Fitting solution	IP	IS			
		Min. Bend Radius (mm)	800	1000			

IP=Interlock Plus
IS=InterLock Super
SP=SpiralFit
MF=Multifit

All hoses are offered with compatible fittings, where the integrated design guarantees optimum performance and reliability, lab tested and validated in field.

The XTRAFLOW hose range uses simple and cost effective SPIRALFIT NO-SKIVE fittings, while the DIAMOND SPIR hoses are coupled with the robust and reliable INTERLOCK technology.

The XXL range is supported by all applicable termination ends, in particular:

- Code 61 and 62 SAE flanges and NPTF males for general hydraulics;
- FLUSHFIT staple-lock fittings for long wall mining;
- An extension of the Manuli XTRAF LANGE for any high pressure and heavy duty applications
- A unique and innovative solution of an integrated dynamic swivel (ROTOFIT), immediately available in 2 1/2" (other sizes to be released upon request)

XXL HOSES & CONNECTORS

APPLICATIONS FOCUS

The reliability of the fluid connectors range is based on an actual product integration that only Manuli Hydraulics can offer: hoses + fittings + crimp machine are designed together, in order to achieve robust and long lasting solutions.

XXL hoses

XXL fittings

MS800

4" Hydraulic hoses

6" Industrial hoses

MS 800 is the appropriate crimping machine, designed with the necessary crimping force (over 800 tons) and preventing the need to utilise spurious commercial machines that have no safeguard or warranty on the assembly process.

XXL hose range is fully integrated with the new MS800 crimp machine. The result is a reliable assembly capability on large bore hoses.

rodaindustria IBÉRICA S.A.

LARGE BORE CHOICE FOR HIGH FLOW RATES

XXL HOSES & CONNECTORS

PRODUCTS HIGHLIGHTS

Manuli Hydraulics' **new XXL hoses and connectors are the safe and appropriate choice.**

The XXL hoses and connectors range is designed with innovative structures and advanced materials in order to achieve the necessary goals of robustness and reliability, meeting the severe working conditions of any application.

The size range is from 2-1/2" to 4", above the traditional hydraulic specifications. Large dimensions should offer an easy handling for installation and routing. In some cases medium to high temperatures exist and hoses should anyway be compliant.

The XXL hose range is composed by medium-low pressures and high pressures hose families, to be selected according to the circuit in the hydraulic system:

A - the medium-low pressure families for return/suction lines and auxiliary systems

XTRAFLOW/HT: low pressure hose for very high temperature applications (135 °C)
XTRAFLOW/2WB: low pressure hose with wire braid construction
XTRAFLOW/4WS: medium pressure hose with spiral construction

B - the high pressure families for feed lines, pressure and discharge lines or special applications; the product range is designed with an isobaric approach and is available in the following pressure levels

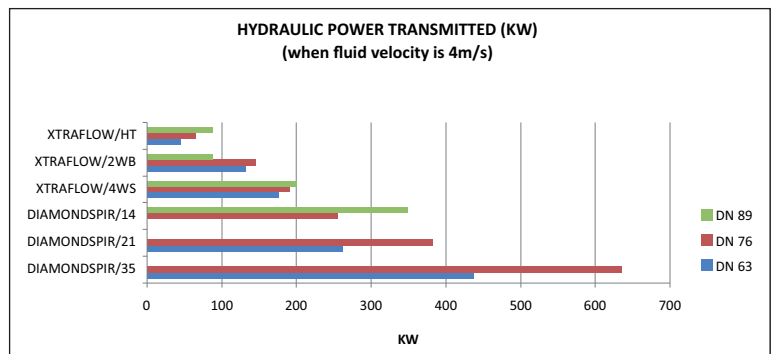

DIAMONDSPIR/14: 140 bar
DIAMONDSPIR/21: 210 bar
DIAMONDSPIR/35: 350 bar

XXL HOSES & CONNECTORS

CUSTOMER ADDED VALUES

The complete hose range is a robust product offer able to meet any possible application of **high pressure and high flow rate requirements** in the above described applications. Within the range, two products in particular have innovative designs and performance:

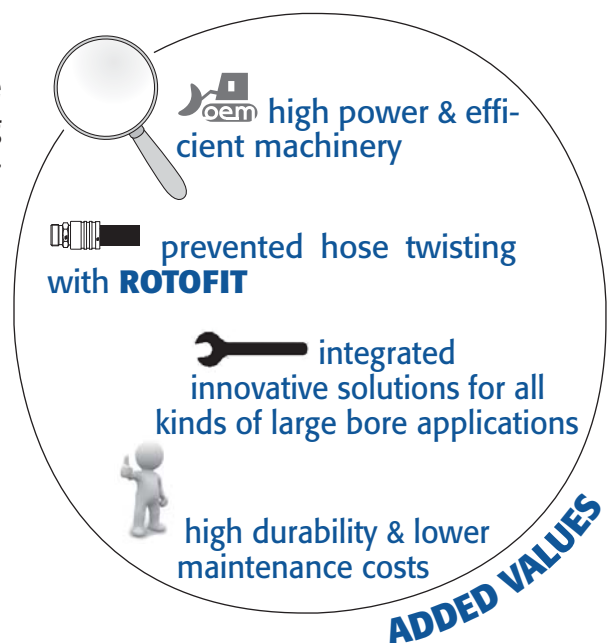

1 - **XTRAFLOW/4WS 4"**: a new DN 100 spiral construction with high kink/collapse resistance to be applied in any severe configuration

2 - **DIAMONDSPIR/35 3"**: an innovative DN 76 hose construction having a unique pressure rating for this size (350 bar)

Main added values for customers:

- **Hydraulic manufacturers** can design and build **more powerful and efficient machinery**.
- **Hose assemblers** can be selected as **qualified partners** of speciality products and can increase their business in this developing technological market segment.
- Both partners can enjoy the robustness of the Manuli integrated design, being assured of its performance and reliability for the demanding applications. No need to search for a fitting, crimping or machine solution in the market or mismatching products with the need of testing and approving the final assembly. This is a key issue in any hydraulic application, but it becomes even more important in this situation, as product alternatives are limited or non-existent in this innovative field.
- **Designers** and **installers** appreciate the reduced bend radius of the XTRAFLOW family and **easy handling** without any risk of hose kinking and collapse.
- **Severe hose installations** with possible twist on hoses can benefit of the innovative **ROTOFIT**, a unique termination end able to swivel under pressure to **prevent hose twisting**.
- All hoses of the XXL line features compatibility with a **wide selection of modern hydraulic oils** in the market without any limitation in use.

As a result of these features for everybody, the hose line is proven to offer a high field durability, reducing the maintenance cost for hose assemblies replacement.

rodaindustria IBÉRICA S.A.

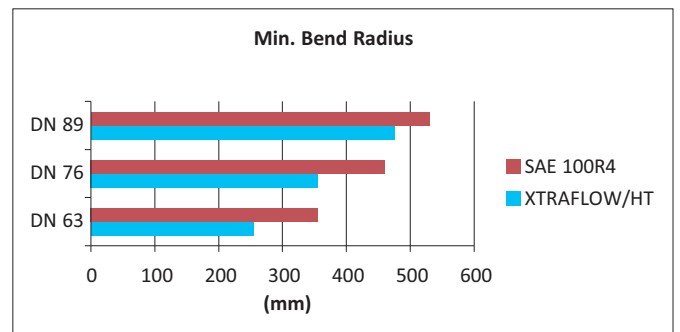

LARGE BORE CHOICE FOR HIGH FLOW RATES

XXL HOSES & CONNECTORS

KEY FEATURES

Hoses

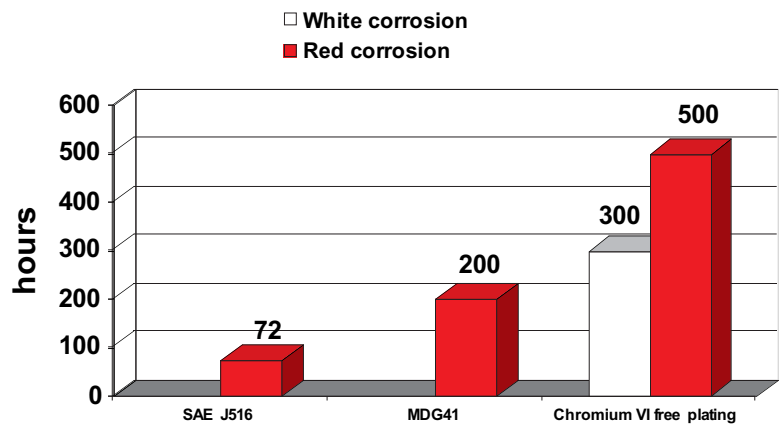

- Suitability for high flow rates
- Low Bend Radii for restricted space installations
- High hose flexibility, easy routing
- No-skive fittings for easy hose assembling (Xtraflow)
- Robust InterLock fitting technology for high pressure lines (Diamondspir)
- **High temperature resistance** for long service life expectancy (**HT style**)
- High robustness of the hose structure for special applications and tough handling
- Special compound designed for long life resistance

Fittings

- **SPIRALFIT** no-skive fitting solution for large bore and heavy duty hoses, supporting easy maintenance activities and the distribution market.
- **INTERLOCK** solution is extremely robust and satisfies the need of safety and reliability for high pressure large bore applications.
- High corrosion resistance of the standard zinc plating chromium-VI-free treatment (ECOAT).
- Special zinc-nickel plating is available upon request for high demanding performance.
- Stainless steel versions available as special solutions upon request.

(ECOAT) Corrosion resistance according to ASTM B117 (ISO 9227) method

63	2-1/2"	40	14	2030	15	40	-30 +110	-22 +230	56	8120

- DIRECT to HOSE concept: less sealing surfaces lead to oil leakage risk reduction
- DIRECT to PORT concept: avoids the use of adapters, allow the direct connection on port.

Reduction of possible leakage points ■ Reduction of assembly cost ■ Risk reduction of assembly operation mistakes ■ Full flow design minimizes pressure drop for optimum system performance ■ Cr3 surface coating for maximum corrosion resistance ■ High performance material with hardened areas in the most stressed points to increase service life ■ High bearing number to guarantee a low rotation effort in all pressure conditions and reduce concentrated load ■ Rotation system totally sealed to avoid dirt inclusion

MATERIAL

- High resistance steel, with hardened areas.
- Sealing system O-Ring NBR with PTFE back-up

SAFETY FACTOR

1:4

TEST SPECIFICATION

ISO 6802, ISO 6803

XXL HOSES & CONNECTORS

MAIN APPLICATIONS

MARINE and OFFSHORE: installations

Large CONSTRUCTION equipment

INDUSTRIAL: hydraulic machines

MINING: underground and open pit mines

OIL RIGS: installations

Vacuum resistance exceeding SAE 100R4 performance ■ Extreme high temperature and heat aging resistance ■ High flow rates
 ■ Reduced bend radius compared to SAE 100 R4

MAIN APPLICATIONS

Suction and return lines in hydraulic systems with high temperature fluids, low pressure hydraulic systems in mining equipment. Remark: compressed air applications require cover pin-pricking and additional safety devices.

CONTINUOUS SERVICE TEMPERATURE RANGE

-67°F / +275°F -55°C / +135°C

MAX OPERATING TEMPERATURE

+300°F +150°C

RECOMMENDED FLUIDS

Mineral oils, glycols and polyglycols, transmission fluids, mineral oils in aqueous emulsion (up to 212°F 100°C), air with oil vapours.

TUBE: Oil resistant synthetic rubber

REINFORCEMENT: Two wire braids of high tensile steel wire

COVER: Synthetic rubber with high ozone, weather and heat resistance

APPLICABLE SPECS.: Manuli design

TYPE APPROVALS: MSHA

STANDARD PACKAGING: Reels
